updating by said entity said information regarding said product based, at least in part, on a medical condition of said recipient.

6. (Currently amended) The method of claim 1, wherein each of a plurality of recipients of said product can each receive a corresponding unique second Internet address to a location of said entity where updated product information regarding said product correlating to each of the plurality of recipients of said product is available.
7. (Cancelled)
8. (Original) The method of claim 1, wherein said product is available via prescription.
9. (Original) The method of claim 1, wherein said product is a drug.
10. (Currently amended) The method of claim 1, wherein said ~~location~~ first Internet address is associated with ~~includes~~ at least one of the following:
 - a call center;
 - a Web page; and
 - a database.
11. (Currently amended) The method of claim 1, wherein said first Internet address includes ~~at least one of the following:~~
 - ~~a telephone number; and~~
 - an URL.
12. (Currently amended) The method of claim 1, wherein said updated product information includes at least one of the following:
 - a picture of said product;
 - product history information;
 - information regarding use of said product; and
 - information regarding potential affects of said recipient's use of said product.

13. (Currently amended) The method of claim 1, wherein said product is a drug and said updated product information includes at least one of the following:

- a picture of said product;
- information regarding use of said product by said recipient;
- information regarding potential side effects of said product to said recipient;
- information regarding dosage amounts of said product by said recipient;
- ~~product history information~~;
- information regarding interaction of said product with another drug; and
- information regarding said recipient's history of use of said drug.

14. (Currently amended) The method of claim 1, further comprising at least one of the following:

- receiving at said entity information regarding said recipient from a service provider associated with said recipient;
- receiving information at said entity from a party regarding said product; and
- receiving information at said entity regarding use of said product from said recipient.

15. (Currently amended) The method of claim 1, further comprising: establishing said first Internet address by said supplier.

16. (Currently amended) A method for providing updated information regarding a product available via a prescription, comprising:

determining, by a supplier that can provide said product to an entity that can provide said product to a recipient, an a first Internet address for a location where product information regarding said product is available; ~~wherein information regarding a product available via a prescription can be found at said location without additional routing;~~

conveying, by said supplier, said product information to a provider database of said entity, wherein said product information is received by said entity from said first Internet address without additional routing performed by said supplier;

receiving, by said provider database, recipient information regarding said recipient of said product from said recipient;

updating, by said entity, said product information regarding said product based, at least in part, on said recipient information;

associating, by said entity, a second Internet address with said updated product information, wherein said updated product information can be accessed at said second Internet address by said recipient without additional routing performed by said recipient;

receiving a prescription at said entity to provide said product to a said recipient;

creating packaging for said product that includes said second Internet address; and

providing, by said entity, said product with said packaging having said copied second address, to said recipient; and

partitioning said updated product information at said second Internet address in accordance with information provided by said recipient.

17. (Currently amended) The method claim 16, wherein said determining ~~an~~ said first Internet address for a location, wherein said product information regarding a said product that is available via a said prescription can be found at said location first Internet address without additional routing by said supplier, further includes at least one of the following:

receiving at said entity said first Internet address from a said supplier that supplies provider of said product;

associating a URL with said location first Internet address by said supplier;

associating a telephone number with said location;

receiving data from said supplier indicative of said first Internet address and said location at said entity; and

selecting by said supplier said first Internet address from among a plurality of available addresses.

18. (Currently amended) The method claim 16, wherein said receiving a prescription to provide said product to a said recipient includes at least one of the following:

receiving, at said entity, said prescription in print format;

receiving, at said entity, said prescription in electronic format;

receiving, at said entity, data indicative of said prescription;
receiving, at said entity, said prescription from said recipient; and
receiving, at said entity, said prescription from a party on behalf of said recipient.

19. (Currently amended) The method claim 16, ~~wherein said creating packaging for said product that includes said address includes at least one of the following:~~

~~providing a label on a container of said product, said label including said address; and~~
further comprising

providing said address on a container of said product.

20. (Currently amended) The method claim 16, wherein said providing said product with said packaging by said entity includes at least one of the following:

selling, by said entity, said product in said packaging;
distributing, by said entity, said product in said packaging; and
providing, by said entity, said product and said packaging to said recipient.

21. (Currently amended) The method of claim 16, further comprising:
establishing said location for said product information by said supplier.

22. (Cancelled)

23. (Currently amended) The method claim ~~22~~16, further comprising at least one of the following:

receiving information, by said entity, regarding said recipient from a service provider associated with said recipient;

receiving information, by said entity, from a party regarding said product; and
receiving information, by said entity, regarding use of said product from said recipient.

24. (Currently amended) The method claim ~~22~~16, wherein said product is available to said recipient by prescription.

25. (Cancelled)

26. (Cancelled)

27. (Currently Amended) A method for providing information regarding a product, comprising:

~~establishing a locating for information regarding a person;~~

~~determining an, by a supplier that can provide said product to an entity that can provide said product to a recipient, a first Internet address for a location where product information regarding a said product is available;~~

~~providing data indicative of said address to said entity that can provide said product;~~

~~conveying, by said supplier, said product information to a provider database of said entity, wherein said product information is received by said entity from said first Internet address without additional routing performed by said supplier;~~

~~receiving, by said provider database, recipient information regarding a said recipient of said product from said recipient; and~~

~~updating, by said entity, said product information regarding said product based, at least in part, on said recipient information; regarding a recipient;~~

~~associating, by said entity, a second Internet address with said updated product information, wherein said updated product information can be accessed at said second Internet address by said recipient without additional routing performed by said recipient;~~

~~generating, by said entity, a packaging associated with said product;~~

~~copying, by said entity, the second Internet address onto said packaging;~~

~~providing, by said entity, said product with said associated packaging having said copied second Internet address to said recipient;~~

~~allowing, by said entity, said person-recipient to partition access to said updated product information;~~

~~receiving a request by said recipient to provide access to a portion of said updated product information to a another party; and~~

~~providing access, by said entity, to said portion of said updated product information by said party if such access is authorized by said recipient.~~

28. (Currently Amended) The method of claim 27, wherein said establishing a ~~said second location~~ Internet address for information regarding a ~~person~~ said recipient includes at least one of the following:

- establishing a Web page by said entity that includes said recipient information;
- determining a link to a Web page by said entity that includes said recipient information;
- establishing regarding said recipient a secure database that includes both said updated product information and personal information; and
- establishing a telephone number with which said updated product information can be retrieved.

29. (Currently Amended) The method of claim 27, wherein said allowing by said entity said ~~person~~ recipient to partition access to said updated product information includes at least one of the following:

- allowing, by said recipient, said another person to control access to all of said updated product information at said entity;

- allowing, by said recipient, ~~said person to allow access~~ by another party to a portion of said updated product information during a time period established by said ~~person~~ recipient;

- ~~allowing said person to allow access to a portion of said information by a service provider;~~

- ~~allowing said person to allow access to a first portion of said information by a first server provider and a second portion of said information by a second server provider;~~

- ~~allowing said person to allow access to a first portion of said information by a first server provider and a second portion of said information by a second server provider, wherein said first server provider does not have access to said second portion of information and said second service provider does not have access to said first portion of information; and~~

- allowing, by said recipient, said ~~person~~ recipient to provide access to at least two distinct portions of said updated product information at said entity to a respective at least two other parties.

30. (Currently amended) The method of claim 27, wherein said allowing said ~~person~~ recipient to partition access to said updated product information at said entity includes at least one of the following:

allowing, by said recipient, said another person to grant an ability to at least one ~~other~~ further person to access said updated product information at said entity;

allowing, by said recipient, said another person to grant an ability to at least one ~~other~~ further person to read said updated product information at said entity;

allowing, by said recipient, said another person to grant an ability to at least one ~~other~~ further person to update said updated product information through conveying further recipient information to said second location; and

allowing, by said recipient, said another person to grant an ability to at least one ~~other~~ further person to add new information to said updated product information through conveying further recipient information to said second location.

31. (Currently amended) The method of claim 27, wherein said receiving ~~a-said~~ request to provide access to ~~a-said~~ portion of said updated product information to a-said party includes at least one of the following:

receiving, at said entity, an electronic communication containing said request;

receiving, at said entity, said request from said another person; and

receiving, at said entity, said request from said party.

32. (Currently amended) The method of claim 27, wherein said providing access to said portion of said updated product information at said entity by said party if such access is authorized includes at least one of the following:

allowing said party to retrieve said portion of updated product information at said entity;

allowing said party to update said portion of updated product information through conveying further recipient information to said second location of said entity; and

sending from said entity said portion of information to said party.

33. (Currently amended) The method of claim 27, further comprising:

providing a notification, by said entity, to said ~~person~~ recipient when access to any portion of said updated product information is granted to another party.

34. (Currently amended) The method of claim 27, further comprising:

determining, by said entity, if said party is authorized to access said portion of said updated product information.

35. (Currently amended) The method of claim 27, wherein said request includes at least one of the following:

- an identifier associated with said ~~person~~ recipient;
- an identifier associated with said portion of updated product information;
- an identifier associated with said party;
- a password that allows access to said portion of information;
- a password that allows access to said location; and
- a URL.

36. (Currently amended) A system for providing updated information regarding a product, comprising:

- a memory;
- a communication port; and
- a processor connected to said memory and said communication port, said processor being operative to:

determine, by a supplier that can provide said product to a an entity that can provide said product to a recipient, a first Internet an address for a location where product information regarding a said product is available;

~~provide data indicative of said address to an entity that can provide said product;~~

convey, by said supplier, said product information to a provider database of said entity, wherein said product information is received by said entity from said first Internet address without additional routing performed by said supplier;

receive, by said provider database, recipient information regarding a said recipient of said product; and

update, by said entity, said product information regarding said product based, at least in part, on said recipient information; regarding a recipient.

associate a second Internet address by said entity with said updated product information, wherein said updated product information can be accessed at said second Internet address by said recipient without any additional routing performed by said recipient;

generate, by said entity, a packaging associated with said product;

copy, by said entity, the second Internet address onto said packaging associated with said product; and

partition said updated product information at said second Internet address in accordance with information provided by said recipient.

37. (Cancelled)
